

# Research *Rounds*

Accredited by UBC CPD

CONTINUING PROFESSIONAL DEVELOPMENT  
FACULTY OF MEDICINE

The Centre for Health Education Scholarship (CHES)  
invites you to Research Rounds with:

## Dr. Paris-Ann Ingledew

Navigating the Internet to Improve Patient  
and Physician Collaboration

**Date:** June 15, 2016

**Time:** 12:00pm to 1:30pm  
(Lunch will be served at DHCC)

**Venue:** Diamond Health Care Centre, room 2267

With videoconference to:

- IRC 305
- CSB V2-222
- PHRM 3321
- MSB 107
- RJH CA 120
- KGH CAC 237
- NHSC 9-374
- Surrey Central City (Manning Rm 4109)

*\*Please be aware that this session will be recorded and made  
available online to CHES members on a password-protected site.*

### Dr. Paris-Ann Ingledew

Clinical Assistant Professor  
Department of Surgery,  
University of British Columbia  
Radiation Oncologist  
BC Cancer Agency, Fraser Valley Centre

a place of mind

**ABSTRACT** In order for patients and physicians to engage in models of shared decision making, it is essential for physicians to be able to understand and integrate the baseline knowledge of patients into each encounter. Increasingly patients are turning to the Internet to gain knowledge about their medical problems. While the Internet provides an infinite information resource, it may be difficult for patients to make judgments about the quality of the information. A potential way to improve patient and physician interactions is to define competencies related to the ability of physicians to aid patients in the interpretation and translation of web-based materials.

As a starting point for a program of research designed to articulate best practices related to patient education, we have developed a framework that can be used by physicians and patients to evaluate web-based resources. Drawing on the principles of design-based research, we iteratively developed and evaluated a tool that may be used by both physicians and patients to evaluate the quality of web-based resources. This research results in articulation of broad categories that may be useful for the assessment of the quality of web-based materials, and informs a larger program of research which will define the skills required by physicians to collaborate with patients, in interpretation of and evaluation of web-based materials.

**ABOUT** Dr. Paris-Ann Ingledew is a Clinical Assistant Professor in the UBC Department of Surgery and a Radiation Oncologist at the BCCA-Fraser Valley Centre. She completed her MD and residency at the University of British Columbia. More recently, working at UBC's CHES with research mentoring from Dr. Glenn Regehr, she completed her Masters in Health Professions Education at the University of Illinois Chicago. She regularly supervises medical students and residents in both clinical and research contexts. Her current research interests are focused on the physician competencies related to patient education and projects related to oncology education in the undergraduate medical setting.

**ACCREDITATION:** As an organization accredited to sponsor continuing medical education for physicians by the Committee on Accreditation of Continuing Medical Education (CACME), the UBC Division of Continuing Professional Development designates this educational program as meeting the accreditation criteria of the College of Family Physicians of Canada for up to 1.5 Mainpro-M1 credits. This program has been reviewed and approved by UBC Division of Continuing Professional Development. Each physician should claim only those credits he/she actually spent in the activity.

*The Centre for Health Education Scholarship (CHES) is committed to enhancing health education scholarship by building capacity for educational scholarship across the Faculty of Medicine through collaboration, team-building, mentorship of new faculty, successful funding applications, and other activities.*
